Key Comparison Points – Truck Hoists

COMPONENTS	TYPICAL COMPETITOR	Hoists EQUIPMENT	ADVANTAGES
Cable System	Winding Drum.	Reeving Cylinder	Block and tackle setup. The cable never comes in contact with itself, very little maintenance required Quiet, smooth and safe operation.
Paint Process	Sprayed on enamels	Powder Coated	Powder coating insures a high UV rating and is more chip resistant.
Controls	Manual control levers, stationary mount, pendants with coil cords.	Wireless remote	Operator can operate the trailer from the cab and can freely move around equipment.
Hydraulic Valve	Manual controls	Electric solenoid valves with LED light indicator and a manual override.	
Safety Lock Valves	None.	This feature is In place for our customers safety.	Increased safety and peace of mind.

COMPONENTS	TYPICAL COMPETITOR	Hoists EQUIPMENT	ADVANTAGES
Greasing	Some models do not use grease zerks. The models that do have them in questionable placement.	Easily greased	Recessed grease zerks on every shaft allows for easy maintenance and minimal to non-existent breakage.
Bronze Bushings	Does not use a figure 8 grease groove. Design makes it very difficult to remove shaft to get to bushing.	Used on all rail rollers and sheaves.	Bronze bushings are easily replaced. Figure 8 grease grooves cut into the bushings allowing the entire shaft to get greased in one rotation of part.
Fenders	Weld on.	Bolt on high quality poly fenders.	Easy replacement and trade out. Lack of cutting or welding means minimal paint damage.

Note: Materials and product improvement is a continuous commitment at NEDLAND INDUSTRIES, INC. These specifications subject to change without notice.
