

Industries, Inc.

Nedland Industries, Inc. continues to lead the way with its quality line of Stationary Compactors.

NC-50 Stationary Compactor

**NC-50
W/Receiver**

Nedland Industries Inc. has long been the leader with it's highly successful line of apartment compactors. Solid waste handling in apartment buildings is and has been a problem until now. The NC-50 is the system you need to fit into the small trash rooms with the power of a unit double its size.

The NC-50, is ideally suited for high-rise applications such as apartment buildings, hospitals, hotels, nursing homes and office buildings where space is limited. The NC-50 has a one-sided container connection system as a standard feature on every machine. This allows the user to easily connect and disconnect the container to the compactor.

With a dedicated waste chute in your building, the NC-50 will make solid waste handling manageable for you and the occupants of your building. This means fewer trips to the dumpster and fewer pickups by your solid waste removal provider as the trash can be compacted into a 2-yard or a 3-yard front or rear-load container which is then pulled outside to be dumped by the trash hauler.
