

NC-400 STATIONARY COMPACTOR WITH RECEIVER

Exceptional compaction force.
Quiet operation. A real workhorse.

Rock-solid waste equipment that outworks the competition

It's built to last because your business comes first.

- ✓ Quietest compactor on the market
- ✓ 5:1 compaction ratio—among the best available
- ✓ Highest quality UL and ETL listed components
- ✓ Most advanced electrical and hydraulic system
- ✓ Lowest-cost maintenance design
- ✓ Exceptional longevity
- ✓ 5-year industry-best warranty
- ✓ Market-leading service—before and after the sale

“

In every measurable aspect, we find that Nedland products exceed the specifications of others who make compactors. Their product is second to none.

—Steve Papai, President,
Automatic Response Systems

Applications

Ideally suited for retail, industrial, and waste management transfer station applications.

Dig into the details

Compactor features

- Replaceable UHMW polyethylene wear bars
- Bypass cylinders
- Removable rear access panel
- Weatherproof control panel and power pack
- Container guide rails

Electrical/hydraulic features

- Controller power unit (PLC)
- Automatic shutdown with auto safety retract
- E-stop button
- Auto/manual selector
- Key lock on/off switch
- Automatic single cycle
- Multi-cycle timer
- Reverse button
- Remote control
- 80% and 100% full lights
- Fluid level and temp gauge
- Fluid-filled pressure gauge
- Inlet fluid strainer
- Left or right side hydraulic and electrical connections
- Low oil sensor shutdown
- Submersible power unit
- Synthetic biodegradable hydraulic fluid

Roll-off compactor receivers

21-yard	28-yard
24-yard	30-yard
25-yard	40-yard
27-yard	42-yard

Specs

Compactor capacity	4 cu yd
Length	16'6"
Width	6'6"
Height	5'4"
Loading height	4'9"
Approx. weight	9,750 lbs
Compactor floor	3/8" steel AR plate with 3" and 6" structural steel channel
Compactor sides	1/4" steel plate with 3" and 6" structural steel channels and 6" x 2" x 1/4" structural steel tubing
Ram face & bottom	3/8" AR steel plate
Platen area	5' x 4' x 3'
Charge opening	5' x 6'6"
Ram penetration	1'2"
Breaker bar	6" x 6" x 1" with 5/8" support plates and retaining teeth
Twin bypass cylinders	7" x 7'6" x 4"
Hydraulic cylinder mounts	(2) 10" i-Beam
Hydraulic hose	15'
Hydraulic fluid	Biodegradable
Wear bars	Replaceable 1/2" UHMW polyethylene
Line pressure	2,000 psi
Max line pressure	2,500 psi
Max ram force	77,000 lbs
Cycle time	40 sec
Fluid capacity	60 gal
Pump	40 gpm
Motor	20 hp/tri-volt, 3-phase

Nedland Industries, Inc.

315 Railroad Street,
Ridgeland, WI 54763

Options

- Cart dumper system
- Container guide rails
- Driver pack out
- Enclosed doghouse with door and interlock
- Fluid reservoir heater
- Fullness monitoring system
- Open hopper for loading dock or ground loading
- Photo eye
- Side-loading hoppers
- Through-the-wall chutes
- Walk on or drive on deck with 42" safety rails
